John Gemski: Instead of currency we should use quote currency. Investopedia has: The quotation and pricing structure of the currencies traded in the forex market: the value of a currency is determined by its comparison to another currency. The first currency of a currency pair is called the "base currency", and the second currency is called the "quote currency". The currency pair shows how much of the quote currency is needed to purchase one unit of the base currency.

Slide 17 FND11-20 related to IND. Need to be carefully coordinated. Review of FCT comments. John G will suggest revised general definition of interest rate. Elisa needs by Feb 3rd.
