## Proceedings:

Continued review of the rights and warrants ontology. We corrected a punning issue (#1628) from the prior pull request and started to review the ontology again with respect to CFI coverage. We have good coverage for allotment, but need to refine subclasses for subscription rights, purchase rights, and warrants based on asset class. All other features are covered for those instruments at this point. We are also missing mini-future certificates/constant leverage certificates and depositary receipts on entitlements in order to complete our coverage of entitlements.
