- [Dean Allemang](#) : ?There's a wiki page about LCA (I remember having learned about LCA in some work I was doing for the EPA; LCA isn't well-respected in general, but I think it does a good job of managing the stages. ?https://en.wikipedia.org/wiki/Life-cycle_assessment?Pawel's stages match here pretty well?except he left out materials?extraction and processing?
- Also, a possibility for recycling at the end. (After all, LCA is all about sustainability)?
