Proceedings:

Today we talked more about the corporate actions ontology. That ontology currently only reflects the security-specific actions in ISO 15022, not those related to meetings, name changes, and other notices. We may need to build it out to cover a broader range of notices / announcements, and to include these other codes. In addition, there is content in that ontology that we don't understand as corporate actions - things that we have elsewhere in FIBO such as interest rates etc. We've sent a note to Mike Bennett to see if he can assist us in understanding those concepts in the ontology better in the context of corporate actions.
