## Proceedings:

Briefly reviewed current work in progress, including work on LCC to add the ISO 3166-2 individuals and M49 with respect to continents, regions and subregions with State Street; briefly reviewed work on changes required for the CFTC, including but not limited to the reference interest rates.

Pete will attempt to generate individuals for the reference rates from the FpML XML file over the next few days to support Elisa in building up the common interest rates ontology. That list can be found at <http://www.fpml.org/coding-scheme/floating-rate-index-2-0.xml> (received the same link from State Street, Deutsche Bank, and Credit Suisse as the definitive lists of rates needed).
