- 5) Todays content discussion.

**SMIF OWL-UML**

**SKOS**

**RDF/S**

- 6) For next week.

## Proceedings:

Today we looked at the status of the remaining open issues, with the bulk of the work being integration of the provisional market indices ontology and build out of some number of the most recognized ones, such as DJIA, S&P 500, etc.

One recently opened issue, IND-71, which is "A change in the definition of the actualExpression causes punning for several economic indicators" needs to be addressed ASAP, prior to this mid-quarter release of FIBO. Punning is considered a show stopper, so this one will be addressed by our next call.
